WORK EXPERIENCE

Software Engineer - II Mastercard

05/2021 - Present

Mumbai, India

Achievements/Tasks

- Responsible for full-stack development, with a strong emphasis on backend systems and APIs. My work primarily involves using Node.js and Puppeteer to develop automation scripts for our Connect application. This platform enables users to easily add and manage bank accounts from multiple financial institutions, providing unified access to their financial data.
- Responsible for UI development and integration, ensuring end-to-end quality through code reviews, reusable components, and optimized user flows. I initiated and developed a Developer Portal featuring essential API documentation, significantly enhancing developer knowledge and improving overall user experience.
- Increased the efficiency of APIs by developing a new service that utilizes APIs from financial institutions to retrieve necessary AO details. This update significantly reduced script execution time by 30% and streamlined the customer onboarding process.
- I recommended changes in the development and maintenance of scripts, and actively participated in the code review process. This led to the adoption of lean coding standards, significantly enhancing team effectiveness and efficiency.

Web Developer Accenture

10/2018 - 05/2021

Mumbai, India

Achievements/Tasks

- Developed websites for our client, Merck, using HTML, CSS, and JavaScript to ensure compatibility across browsers and devices. These websites typically featured detailed prescription information for medicines, catering to both medical practitioners and consumers of the products.
- I collaborated with the US team to maintain and develop websites. Recognizing my capabilities, my manager entrusted me with a new initiative where I served as the sole individual contributor. I was responsible for developing websites tailored specifically to meet the requirements of our client in Korea.
- Performed rigorous testing and debugging to enhance website performance across diverse browsers and devices. Managed version control and code repositories using Git to uphold code integrity and facilitate collaborative development.
- Conducted code reviews and provided feedback to maintain code quality and ensure adherence to best practices.

SKILLS

HTML

CSS

Javascript

jQuery

Bootstrap CSS

Tailwind CSS

SQL

Node.js

React.js

Redux

Express.js

Puppeteer

PERSONAL PROJECTS

Jarvis AI Assistant

- Developed a modern, interactive chatbot application using React JS and Groq APIs to provide users with a conversational interface for common queries and tasks. Designed the application to simulate intelligent responses and support real-time communication.
- URL : <https://askjarvis.netlify.app/>

Moviemate

- Developed a web application that helps users discover and track movies of interest. The application provides a user-friendly interface for searching and filtering movies using data from The Movie Database (TMDB) API. It was built using React.js and Tailwind CSS, and is deployed on Netlify for seamless access.
- URL : <https://yourmoviemate.netlify.app>

Shopmate

- Developed a web application that provides a seamless online shopping experience. The application features product listings and a shopping cart built using React.js. Implemented advanced state management techniques using Context API and Reducers for efficient data handling and user interaction.
- URL : <https://yourshopmate.netlify.app>

Todo List

- Developed a simple and intuitive Todo List application using React.js. The application allows users to save and manage their daily tasks efficiently. Users can add new tasks, mark them as completed, and remove them from the list once done.

EDUCATION

Bachelor Of Engineering (Computer Science)

Mumbai University

06/2014 - 06/2018

7.33 CGPA

CONFERENCES & COURSES

Certified ScrumMaster (04/2024 - 04/2026)

Scrum Alliance

- I participated in the classroom training conducted by Amit Kulkarni. In this training session, I got to learn more about the Scrum methodologies and how we can utilize them to help teams complete project deliverables quickly and efficiently.
