5+ years of experience in developing websites and cutting edge engineering solutions. Particularly adept with HTML, CSS, JavaScript, Node.js & React.js. Also having hands-on experience with tools like MySQL, Tableau, Snowflake & Splunk. Seeking a position in an environment which emphasizes teamwork and encourages learning by doing.

WORK EXPERIENCE

Software Engineer - II
Finicity, A Mastercard Company

05/2021 - Present   *Mumbai, India*

Achievements/Tasks

- I worked on resolving existing UI bugs and also worked on developing additional features for our application named Connect using React.js. These product features would, in turn, help us improve the overall user experience.
- Developing automation scripts using JavaScript, Node.js and Puppeteer to extract information required by the API's to provide the customers with their financial data as and when requested.
- Teamed up with current clients to understand needs for improved functionality and also worked with engineers and clients to develop enhancements that boosted client satisfaction.
- Recommended changes in development & maintenance of scripts, leading to adoption of lean coding standards that helped increasing the team effectiveness and efficiency.

Web Developer
Accenture

10/2018 - 05/2021   *Mumbai, India*

Achievements/Tasks

- I initially worked on developing web pages for e-commerce websites and also single-handedly worked for our international client by helping them develop and maintain their e-commerce website.
- Design, build and maintain websites using authoring or scripting languages, content creation tools, management tools and digital media.
- Maintaining understanding of current web technologies or programming practices through continuing education, reading and participating in professional conferences, workshops or groups.
- Evaluate code to ensure that it is valid, properly structured, meets industry standards and is compatible with browsers, devices or operating systems.
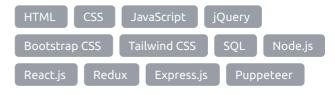

EDUCATION

Bachelor Of Engineering (Computer Science)
Mumbai University

08/2014 - 06/2018   *7.33 CGPA*

SKILLS

HTML   CSS   JavaScript   jQuery
Bootstrap CSS   Tailwind CSS   SQL   Node.js
React.js   Redux   Express.js   Puppeteer

PERSONAL PROJECTS

Codebook
- A web application that gives you an Ecommerce shopping experience. This application has been built using React.js and I have utilized concepts like context, reducers & JSON server auth.
- URL : https://yourcodebook.netlify.app/

Moviemate
- A web application that helps you find movies that you can look out for. This application has been built using React.js, Tailwind CSS, and the TMDB API and is deployed on Netlify.
- URL : https://yourmoviemate.netlify.app

Shopmate
- A simple web application that gives you an online shopping experience. This application has been built using React.js and I have utilized concepts like Context and Reducers.
- URL : https://yourshopmate.netlify.app

Todo List
- I created a Todo List using React.js. With the help of this To-Do List one can save his/her tasks on day-to-day basis and can remove the listings once the task is completed.
- URL : https://ticktickgo.netlify.app/

ACHIEVEMENTS

Certificate of Appreciation (12/2021 - 01/2022)
Participated in problem solving events held on HackerRank which is a coding platform and secured a Gold badge by solving complex problems based on Data Structures.
